

208.26 Rules — inspection of site.

The division may adopt rules to implement the provisions of this chapter. The administrator or the administrator's designee may enter at all times upon any mine site or suspected mine site for the purpose of determining whether the operator is or has been complying with the provisions of this chapter. All operators shall cooperate with the division in seeking methods of operation which will cause minimum disruption to the land and property adjoining a mining operation.
